

Reviewing advisers & service providers

The **simple**, **quick**, **cost-effective** way

There are lots of reasons to review your pension scheme advisers & providers:

- compliance with The Pensions Regulator's general code
- adviser, trustee or employer people changes
- delays in delivery or poor quality work
- increasing fees & scope creep
- changing needs or scheme objectives
- tensions in working relationships
- no recent review
- demonstrating ongoing good governance.

There is one easy solution: Vidett's online assessment

Our online tool helps you quickly assess adviser and provider performance, service provision and value for money by obtaining the thoughts and view of the scheme's stakeholders. Designed to encourage honesty, you benefit from obtaining a broad and balanced view.

Results are clearly presented in a report with valuable insights enabling you to make informed decisions on whether further action is needed. It can help:

- stimulate discussions to ensure your goals can be met
- identify and address issues early to enhance service
- improve value for money
- highlight if a more in-depth review is worthwhile (for example, benchmarking or tender exercise).
